EDUCATION

Bachelor Of Computer Applications
Kadi Sarva Vishwavidyalaya, Gandhinagar
Jul 2018 - Jul 2022

PROJECT PORTFOLIO

Comprehensive design portfolio showcasing diverse UI/UX solutions and digital experiences.

[Behance Link](#)

IoT Ecosystem | Web & Mobile Interfaces

Conceptualized and designed the complete system interface in Figma for a telemetry-driven IoT platform.

- Administrative dashboards for corporate and IoT user segments
- Live telemetry data visualization and analytics
- Automated alarm frameworks and notification systems
- Dedicated web-based monitoring portals

Infosnap | Cross-Platform Workforce Management

Executed full UI/UX design in Figma for a specialized professional workforce solution. Key features include:

- Operational image documentation for field staff
- Integrated real-time GPS tracking capabilities
- Structured data organization for project-specific tasks
- Seamless performance across mobile and web environments
- Scalable architecture for various industrial deployments

[Mobile app Link](#)

Hilop | Digital Wellness Solutions

Led Figma UI/UX designs for web and mobile platforms and spearheaded frontend development using Next.js.

- Integrated e-commerce purchasing and checkout workflows
- Subscription management and usage analytics tracking
- Loyalty-driven reward and coin distribution system

Web Design & Development

Thinknovus: Figma UI design and Next.js development featuring high-fidelity animations via Framer Motion and GSAP. [Web URL](#)

PSL Global: UI designed in Figma and implemented with Next.js, utilizing GSAP and Framer Motion for fluid motion. [Web URL](#)

Shivatva: Created intuitive UI in Figma and developed via Next.js with sophisticated Motion and GSAP effects. [Web URL](#)

Techvoot: Figma-based UI design and frontend implementation using PHP and HTML standards. [Web URL](#)

Servicejee | Web & Dual Mobile Applications

Developed end-to-end UI in Figma and implemented the web frontend using Next.js for a robust corporate service management ecosystem.

- Enterprise-grade job creation and dispatching tools
- Integrated task management systems for technicians
- Real-time geographical location monitoring
